Lunchie

2/2016 - 1/2018
Designer Developer/CO-Founder

Jose is a Helsinki based UX Engineer, Designer and Developer with an excellent understanding of aesthetics, visual design and user experience. His high awareness of industry trends, innovative new ideas and practical problem solving skills effectively bridge the gap between the development and design teams.

He holds a passion for producing precise output in his professional work creating high quality solutions that are user-friendly, responsive and optimized.

EDUCATION

Rastor

Product Design and project management vocational school graduate, Spring 2019

His great sense of conscientiousness, high motivation, adaptability and keen attitude towards learning new technologies make him a valued and solid asset in a team contributing to the company's goals. His clear communication skills enable him to provide useful insights, manage instructions and assist others. He handles feedback and criticism well and keenly learns from it.

LANGUAGE

Finnish	Native speaker
English	Fluent
Swedish	Basics

He has valuable skills and experience in his field. He has worked with many different clients ranging from small businesses and entrepreneurs to large corporations and organizations such as Nokia, Microsoft, Arla and The University of Helsinki. His company won the SITRA innovation award in 2016.
